Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

1. Nature Of Operations And Going Concern

Cerro Mining Corp. (“Cerro” or the “Company”) was incorporated pursuant to the *Business Corporations Act* of British Columbia and is a shell company seeking a new business venture. Cerro’s shares are listed on the NEX board of the TSX Venture Exchange (the “TSXV”). The Company’s head office and principal place of business is 1030 West Georgia Street, Suite 1507, Vancouver, BC, V6E 2Y3. Cerro and its subsidiaries are collectively referred to as the “Company”. The Company is contemplating a transaction with Friday’s Dog Inc. See note 5 for further particulars.

These condensed interim consolidated financial statements have been prepared on the going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. For the six months ended July 31, 2021, the Company has not generated any revenues and incurred negative cash flow from operations. As at July 31, 2021, the Company has a working capital of \$10,502,544 (January 31, 2021 – \$236,119), and an accumulated deficit of \$50,670,578 (January 31, 2021 - \$50,378,350). The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that sufficient working capital will be obtained from external financing to meet the Company’s liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These condensed interim consolidated financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

The covid-19 pandemic has had adverse impacts on the Canadian and global economies, disruptions of financial markets and created uncertainty regarding the Company’s future operations. The covid-19 pandemic could adversely affect the ability of the Company to fund and enter into a transaction to acquire business assets. The extent to which the covid-19 pandemic impacts the Company’s business, results of operations and financial condition will depend on future developments which are highly uncertain and cannot be predicted. Such future developments include but are not limited to the effectiveness of vaccine programs, new covid-19 variants and remedial actions and stimulus measures adopted by governments.

Even after the covid-19 pandemic subsides, the Company may experience adverse impacts to its business as a result of any economic recession or depression that occurs. The Company cannot reasonably estimate the impact of the pandemic on its business, liquidity, capital resources or financial results.

2. Basis of Presentation

(a) Statement of Compliance

These condensed interim consolidated financial statements have been prepared in accordance with *IAS 34 - Interim Financial Reporting*. They do not include all of the information required for full annual financial statements and should be read in conjunction with the Company’s audited annual consolidated financial statements for the fiscal year ended January 31, 2021, which were prepared in accordance with International Financial Reporting Standards (“IFRS”). These condensed interim consolidated financial statements were approved by the Company’s board of directors on September 29, 2021.

(b) Accounting Policies

The same accounting policies and methods of computation have been employed in these interim financial statements as were used in the most recent annual financial statements.

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

2. Basis of Presentation (continued)

(c) Basis of Measurement

These financial statements have been prepared on a historical cost basis, except for the revaluation of certain financial assets and financial liabilities to fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

(d) Basis of Consolidation

These consolidated financial statements comprise the financial statements of Cerro and its subsidiaries, while still owned. These consolidated financial statements include all the assets, liabilities, revenues, expenses and cash flows of Cerro and its subsidiaries after eliminating inter-entity balances and transactions, including the accounts of Minera de Oro Arequipa and, until their disposition in March 2020, Compania Minera Cerro El Diablo and its subsidiary Sociedad Minera Capella Limitada.

(e) Use of Estimates and Judgments

The preparation of these condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed interim consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These condensed interim consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the condensed interim consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Company reviews its estimates and underlying assumptions on an ongoing basis.

Critical Judgments

The following are critical judgments that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in these financial statements:

- Management is required to assess the functional currency of the Company. In concluding that the Canadian dollar is the functional currency of the Company, management considered the currency that mainly influences the operating expenditures in the jurisdiction in which the Company operates.
- The determination of categories of financial assets and financial liabilities has been identified as an accounting policy which involves judgments or assessments made by management.

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

2. Basis of Presentation (Continued)

- Management is required to determine whether or not the going concern assumption is appropriate for the Company at the end of each reporting period. Considerations taken into account include available information about the future including the availability of financing and revenue projection, also liquidity of its assets, current working capital balance, and future commitments of the Company.
- Judgment is required in determining whether deferred tax assets are recognized in the statement of financial position. Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets.

Estimation Uncertainty

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the current and next fiscal financial years:

- Provisions for income taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxation authorities. Where the final outcome of these tax-related matters is different from the amounts that were originally recorded, such differences will affect the tax provisions in the period in which such determination is made.
- The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.
- The fair value of accrued liabilities at the time of initial recognition is made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors.

3. Marketable Securities

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

4. Exploration and evaluation assets

Dorado Properties, Chile

The Company owned a 100% interest in the Dorado properties located in the Copiapo area of northern Chile. Part of the Dorado properties includes three exploration claims, acquired pursuant to a third-party option agreement with a Chilean company, which it disposed of in March 2020 as part of the disposal of its Chilean subsidiary for total consideration of \$1 resulting in a gain of \$132,779. Due to considerable uncertainty regarding the outlook for the Dorado Properties, the Company expensed exploration costs as incurred as set out below:

Period ended July 31,	2021	2020
	\$	\$
Office and storage fees	-	2,765
	-	2,765

5. Friday's Dog Inc.

In July 2021, the Company entered into a definitive agreement with CAIR by David Cosmetics Inc., a Los Angeles-based company focused on a premium hair care and pet care products business. In the interim, the principal of CAIR by David Cosmetics Inc. passed away and the company's operating plan was updated, including being renamed to Friday's Dog Inc. ("FDI").

The Company proposes to acquire all of the issued and outstanding common shares of FDI (the "FDI Shares") by way of a three-cornered amalgamation (the "Transaction") that will permit the Company to relist its common shares on Tier 2 of the TSXV. The resulting entity from the Transaction will continue the business of FDI. On closing of the Transaction, Cerro will change its name to Friday's Dog Holdings Inc.

It is now contemplated that the Transaction will close by December 31, 2021 with the option of an extension to February 28, 2022 with approval of the boards of directors of both the Company and FDI. The Company expects to issue approximately 25,000,000 shares to the current shareholders of FDI as consideration for all of the issued and outstanding FDI Shares. The Transaction will constitute a reverse takeover transaction and a reactivation of Cerro under the policies of the TSXV.

In May 2021, the Company completed an offering of subscription receipts raising gross proceeds of \$10,109,000 by the issuance of 20,218,000 subscription receipts at a price of \$0.50 per subscription receipt (the "Concurrent Financing"). The gross proceeds of the Concurrent Financing were deposited into escrow with Computershare Trust Company of Canada and will be held in escrow until September 30, 2021 pending satisfaction or waiver of escrow release conditions including, among others, receipt of approval by the TSXV and approval by Cerro's disinterested shareholders of the acquisition by Cerro of all of the issued and outstanding common shares of FDI by way of the three-cornered amalgamation described above. When the escrow release conditions have been satisfied, the subscription receipts will result in the issuance of an additional 20,218,000 common shares of the Company.

Due to the changes in FDI circumstances, the Company is seeking to extend the escrow period in accordance with the revised closing schedule since it will not be possible to satisfy the escrow terms by September 30, 2021. In conjunction with the revised escrow terms, the Company intends to amend the terms of the subscription receipt offering such that each subscription receipt will be exchangeable into one common share and a half-warrant to purchase one common share at a price of \$1.00 for two years.

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

5. Friday's Dog Inc. (continued)

In connection with the Transaction, FDI completed an offering of unsecured convertible debentures (the "FDI Debentures") which raised \$6,300,000. The principal amount of the FDI Debentures bears interest at 8% per year payable annually, and the FDI Debentures are due April 23, 2023. Prior to the Transaction, the FDI Debentures are to be converted into 18,000,000 FDI Shares, subject to approval by the TSX-V.

Completion of the Transaction is subject to approval of the Transaction by the TSXV and several conditions, including customary due diligence and approval by disinterested shareholders of Cerro and FDI and approval of holds of at least 67% of the subscription receipts to extend the escrow term as outlined above.

6. Share Capital

Authorized: Unlimited number of common shares without par value

In May 2021, the Company completed an offering of subscriptions receipts raising gross proceeds of \$10,109,000 by the issuance of 20,218,000 subscription receipts at a price of \$0.50 per subscription receipt. The gross proceeds were deposited into escrow with Computershare Trust Company of Canada and will be held in escrow until September 30, 2021 pending satisfaction or waiver of escrow release conditions including, among others, receipt of approval by the TSXV and approval by Cerro's disinterested shareholders of the acquisition by Cerro of all of the issued and outstanding common shares of FDI by way of the three-cornered amalgamation described above. When the escrow release conditions have been satisfied, the subscription receipts will result in the issuance of an additional 20,218,000 common shares of the Company. In addition, at that time, the Company expects to pay finders' fees of up to \$263,670.

Due to the changes in FDI circumstances, the Company is seeking to extend the escrow period in accordance with the revised closing schedule since it will not be possible to satisfy the escrow terms by September 30, 2021. In conjunction with the revised escrow terms, the Company intends to amend the terms of the subscription receipt offering such that each subscription receipt will be exchangeable into one common share and a half-warrant to purchase one common share at a price of \$1.00 for two years.

In May 2020, the Company closed a non-brokered private placement and issued 10,000,000 units at a price of \$0.05 per unit for proceeds of \$500,000. Each unit comprised one common share and one share purchase warrant exercisable until May 18, 2021 at an exercise price of \$0.065 per share.

Warrants

In May 2021, warrants to purchase 10,000,000 shares were exercised, raising proceeds of \$650,000.

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

7. Related Party Transactions

The Company incurred key management and board of directors compensation as follows:

	Three Months Ended		Six Months Ended	
	July 31, 2021	2020	July 31, 2021	2020
	\$	\$	\$	\$
Management fees	6,290	3,330	8,240	9,330

Included in the above is \$6,290 (2020 - \$3,330) for services provided by S2 Management Inc., a company controlled by the Company's CFO. At July 31 2021, accounts payable due to related parties were \$4,444 (January 31, 2021 - \$nil).

8. Segmented Information

The Company has one reportable operating segment, being that of a shell company seeking a new business venture.

9. Financial Instruments and Risk Management

(a) Fair values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's consolidated statement of financial position as at July 31, 2021 as follows:

	Fair value measurements using			Balance, July 31, 2021
	Quoted prices in active markets for identical instruments (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
	\$	\$	\$	\$

	282,580	—	—	282,580

Cerro Mining Corp.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended July 31, 2021

Expressed in Canadian dollars

9. Financial Instruments and Risk Management (continued)

The fair values of other financial instruments, which include GST receivable, accounts payable and accrued liabilities and loans payable, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consists primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. GST receivable is due from the Government of Canada. The carrying amount of financial assets represents the maximum credit exposure.

(c) Liquidity Risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they fall due. All of the Company's financial liabilities have contractual maturities of less than 90 days. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities.

(d) Foreign Exchange Rate Risk

Foreign exchange risk is the risk that the Company's financial instruments will fluctuate in value as a result of movements in foreign exchange rates. The Company currently operates only in Canada but has an inactive subsidiary in Peru. The Company is exposed to foreign exchange risk due to fluctuations in the Peruvian sol as they affect residual liabilities. The Company does not use derivative instruments to hedge exposure to foreign exchange rate risk however management of the Company believes the exposure to foreign currency fluctuations is not significant.

10. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of cash, marketable securities, and equity comprising issued share capital and share-based payment reserve.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its board of directors, will balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged from the year ended January 31, 2021.

11. Subsequent Events

Proposed Transaction with Friday's Dog Inc.

In September 2021, the Company entered into an amended agreement with Friday's Dog Inc. as described in note 5.

Dissolution of Subsidiary

In September 2021, the Company received notice that its inactive subsidiary, Minera de Oro Arequipa, had been successfully dissolved. The Company no longer has any subsidiaries.
